SECOND NEWSLETTER

FOR HYBRID EDUCATION

Project progress!

The main objective of the Web 2.0 Hybrid Education project is to enable primary and secondary teachers to use Web 2.0 tools and increase the quality of hybrid education. The use of Web 2.0 tools in education provides a more suitable teaching environment. By improving teachers' skills, the Web 2.0 partnership hopes to increase the quality of education and encourage student participation in their own learning.

We are currently between IO2 and IO3 of this project, we have finished the part related to the videos, they are translated and are being uploaded to the website to be able to start the piloting of the project that will take place in the next months of April and May.

Fourth transnational meeting of the project in Vienna, Austria

What are we working on?

The Web 2.0 project is currently developing the E-Learning Platform, where all the videos are translated into different languages.

An easily accessible platform that will contain all the resources created during the project and that will be used as a guide for those who use Web 2.0 as a reference.

In addition, we will have the Digital Guidetool, with this tool, teachers will be able to find the type of tool they can use for their

Third Transnational Meeting of Projects
in Prague, Czech Republic

specific needs. It will also guide teachers on how to integrate Web 2 tools into their hybrid classes.

During the months of April and May, the different countries participating in the project will organize the piloting of the project and the testing of the platform.

Thus, expecting a total of at least 100 registered participants in the E-Learning Platform.

Next step of the project:

The association is currently working hard to complete the E-learning Platform, which will soon be available online!
